

EBL lighting system

The lighting system Type **EBL** is an air-proof and particle-tight system for our **clean-tek** ceiling systems.

The lighting system is inserted into the ceiling from top side; from below it is flush to the ceiling system.

The chassis is made of powder coated sheet steel in which the electrical components are fixed, such as electronic ballast or light tube sockets.

Technical data

Chassis	Particle-tight sheet steel
Grid size	625 x 625 or 600 x 600 mm
Light modules	3 x 36 / 3 x 55 W Dulux L
Reflector	Aluminium highgloss mirrored
Protection type	IP 54
Connection	Plug-in system with 3 x 1,5 mm feed-through wiring
Ballast	Electronic ballast Osram or BAG
Diffuser	Sand-blasted 4 mm ESG glass diffuser

Special options

Electronic dimming ballast
Electronic ballast with switched actuators
Battery-powered emergency lighting
Emergency lighting powered by external emergency power supply
Light modules
2 x 36 / 2 x 55 W Dulux L

Option LED

8x High performance LED
10,1 Watt per unit
Lumen maintenance 11280
